I am a junior level web developer, trained in both Front End and Back End development. I first became interested in developing web application while producing a web series in college and quickly fell in love with intricate, responsive design. I view every programming problem is an intricate puzzle just waiting to be solved.

Projects

Draw It! Describe It!
- An off the wall game in which users are asked to draw an image based on a description or vice versa
- Made with jQuery, PostgreSQL, blackboard.js, and HTML5 Canvas in a Rails environment, and live version deployed on Amazon EC2 and S3
- original sample version at https://di-di.herokuapp.com

UPSTARTED
- a mock business app made with Ruby and Sinatra

ECOBLOG
- a simple blogging site made with Ruby on Rails

Education

NEW YORK CODE AND DESIGN ACADEMY: JUNE 2015
